TitraLab® AT1000 and KF1000 Series Workstations Software Update Procedure

1. On the PC, copy the content of 'USB Drive' folder from the zip file onto a USB flash drive.
The HACH\SOFT folder must contain a [Model name]_Vx_xx.CAB file.

2. Make sure that there are no USB flash drives connected to the instrument. Then, connect the USB flash drive containg the new software to the instrument.

3. Power on the instrument and press the down arrow key. Keep the down arrow key pressed until the upgrade user software program is launched.

4. The new and current software versions are displayed. Press **Yes** to upgrade to the new software.
